

East Tāmaki School Panui

Professional Learning for Staff

During the last term break (holidays) the East Tāmaki School staff were at school doing some learning. This learning was to improve our knowledge and skills so that we are even better at teaching your children.

Growth Coaching

The staff spent the last Thursday of the break at school in a workshop session with a facilitator – Kicky Knight. This session focussed on setting goals and implementing them. The goals were i-smart goals.

- That is
- Inspiring
 - Specific
 - Measurable
 - Achievable
 - Results focussed
 - Timebound

So a goal could be: by the 11 August I have assessed all my students in writing so that I know the level they are at and gaps that each child needs support with.

We will continue to work on our goals to ensure they are met. We will also begin working with students on Growth Coaching.

First Aid

Staff also attended first aid training so that we are able to give First Aid medical care to your children or our staff and know how to manage emergency care if we should ever need to. Each staff member who attended is now certified to provide First Aid at our school.

FIRST AID TRAINING
